

Security Barrier Mesh

When it comes to protecting your family from an intruder or wanting to protect valuables from a burglar, we have the safety and security to meet your needs. We can turn any room in your house into a cage or safe room to protect your valuables or what is important to you. Our design is the same system that the federal, state and local government use to protect their valuables or important personnel member.

- Protects against break-ins and break-outs on metal studs or wood studs framing
- Ideal for use in lieu of reinforced concrete or concrete block
- High-strength and fire-resistant
- Made from carbon steel
- Permitted for use in UL-Wall Assemblies

The FBI, ATF, Department of Defense, military facilities, state, local government, and airport use the products we install to protect valuables, property and people. Now you have the same opportunity to use the same products to protect your family and valuables. The products are cost-effective and highly efficient, retrofitted into any room to provide a high level of protection and security.
